

March 19, 2020

YXE Vision Families,

Effective Monday, March 23, 2020, our offices will be shifting to providing only urgent eyecare. As per the recommendations provided by the Saskatchewan Association of Optometrists and the Saskatchewan Health Authority, all routine eye exams will be suspended at this time.

We remain available for all urgent eye concerns, including injuries, infections, flashes/floaters, vision loss, and any other urgent vision concerns. We are happy to discuss any questions or concerns you may have over the phone if you are unsure if you should be seen during this time. Please feel free to call us at (306) 664-2638.

Along with this change, we will be adjusting our office hours at Stonebridge Eyecare, Pinehouse Eyecare and Warman Eyecare to **Monday through Friday 9:00 am to 3:00 pm**. Broadway Eyecare will be temporarily closed. This allows us to provide the best possible eye care to our community that we can and to reduce strain on walk-in clinics, urgent care facilities and hospitals.

Now, as always, we truly value your sight and understand how important it is that you see as well as possible. As such, we remain committed to ensuring the you receive your glasses, contact lenses and therapeutics in the most timely and efficient way possible. We can offer free home delivery within the cities of Saskatoon and Warman, as well as parking-lot hand-offs or mail delivery. Please contact our office to determine which is the best option for you and your family.

We are moving to this model to protect our team, our patients and our community. We need to all ban together and do our part to limit the spread of the COVID-19 virus.

Thank you for your understanding and cooperation. We look forward to seeing you all again soon.

The Doctors and Staff of YXE Vision Group
